

DJ Library Organizer - Windows Setup Guide

Overview

This guide explains how to install and use the DJ Library Organizer on Windows for large Serato DJ Pro and VirtualDJ music libraries.

Requirements

- Windows 10 or 11
- Python 3.11 or newer
- Music library backup
- Serato DJ Pro and/or VirtualDJ

Recommended Folder Structure

```
D:\DJ_MUSIC
■■■ Hip-Hop
■■■ House
■■■ Reggaeton
■■■ Afro House
■■■ Videos
■■■ _Reports
■■■ _Review_Low_Quality
■■■ _Review_Corrupted
■■■ _Review_Missing_Tags
■■■ _State
```

Install Python

Download Python from <https://www.python.org/downloads/windows/> and enable 'Add Python to PATH' during installation.

Install Required Libraries

Open Command Prompt or PowerShell:

```
pip install mutagen pandas
```

Project Setup

Example project folder:

C:\Users\YourName\Documents\DJ_Organizer

Place:

- dj_library_organizer_full.py
inside this folder.

Configure Source and Destination

Inside the script:

```
SOURCE_ROOT = Path(r"D:\Music")  
DEST_ROOT = Path(r"D:\DJ_MUSIC")
```

Recommended Workflow

1. Run Audit

```
python dj_library_organizer_full.py --audit
```

2. Dry Run Test

```
python dj_library_organizer_full.py --dry-run --only "Hip-Hop" --limit 1000
```

3. Copy Test

```
python dj_library_organizer_full.py --copy --only "Hip-Hop" --limit 1000
```

4. Full Move

```
python dj_library_organizer_full.py --move --only "Hip-Hop" --resume
```

Clean Audit Mode

Verify migrated folders:

```
python dj_library_organizer_full.py --clean
```

This creates CSV reports showing:

- Possible wrong genre folders
- Filename problems
- Missing tags
- Low bitrate tracks
- Uncategorized tracks

Review Folders

Low bitrate tracks:

D:\DJ_MUSIC\Review_Low_Quality

Corrupted files:

D:\DJ_MUSIC\Review_Corrupted

Missing tags:

D:\DJ_MUSIC\Review_Missing_Tags

Serato Setup

Inside Serato:

- Use the Files panel
- Add D:\DJ_MUSIC
- Analyze files
- Use Smart Crates after importing

VirtualDJ Setup

Inside VirtualDJ:

- Add D:\DJ_MUSIC as favorite folders
- Rebuild search database
- Verify tags and comments

Important Safety Notes

- Always back up your library first.
- Always test with --dry-run first.
- Use --resume for large migrations.
- Do not run move mode without verifying CSV reports.
